9 Day Practical Permaculture Workshop August 5-14 2011

Learn Adobe and Ferrocement building methods while residing at a tropical organic farm in the coastal mountainous rainforest of Southwest Costa Rica

As a group we will construct a large earthen oven and a ferrocement water tank. These building methods are ecologically friendly and take advantage of local materials. Course is hands-on so come prepared to get dirty and work hard. Your instructors will share both the theory and practical skills you need to learn these two exciting building techniques.

\$800 includes lodging in cabins, all meals, instruction, and side excursions. Does not include airfare or transport to Finca Carolina

Juan Rojas

Permaculture Design Teacher specializing in environmental reconstruction and co-founder of the Permaculture Institute of El Salvador and the Mesoamerican Permaculture Institute in Guatemala.

Natalia Vega

Agricultural Engineer, Teacher, and Permaculture Designer trained at EARTH University. Her current work focuses on native plants, microbial fertilizers and the design of her own composting toilet.

Andrew Ogden

Co-founder and manager of UTSI and a 10 year inhabitant of Costa Rica with a MS in Horticulture. He teaches, facilitates and conducts research specializing in plants of tropical climates.
